

Hosts of
Laboulbeniaceae

1910 - 1915

R. Thaxter

1905 - 2532

N^o

1905. *Ecthoris*

^{underly the right}
Lawrence Kansas. *Corthorn*. on legs.

1906 ? *Benthamia*?

E. humilis on *elytra* (Kunze) -

Mendocino, vicinity. *francina*.

A. Williamsfield

N^o 1907
1529. 2042

on ? 1726. Mottled wing ? *Pangloss*. Fly three b.
3 in all, 1 with 1, 1 w. ^{marked} ~~marked~~
on thorax. *Stigmata* - ~~very rare~~ only 1 w. ~~marked~~

N^o 1908

Philopa
dull ~~beefy~~ ant legs blackish.
on legs. abd.

N^o 1909

Philopa
brighter beefy. ? same as last. *Stigma*. ? not on

N^o 1910

Oscinis
Purple. red. *boxis* small fly - abd.

N^o 1911.

Discocerina
small iniquif. *Pangloss*. on legs.

N^o 1912

Par. minima decipiens Sw.
dull brown big. headed fly w. first legs all
dark. 5 smaller species. 2 dark legs on ant. legs
very rare, on only.
1/1 Williamsfield. *francina*

Jamaica W. & Williams' Isles

N-1913

2047

Paralimna - sp. *decipiens* Sw.

on inf. tip left. abd. dark largest fly. about size of last.

N-1914.

Succophilus

Ch. prader marginatus

N-1915-②

Porous & Jamaica

host? Same as 1913: tip abd. a little sup. is
~~longer than the body~~ fly on
dark tips. same as same as 1913

See 2052, 54-6 (*Notiphila*) *Paralimna decipiens* Sw.

N-1916.

Paralimna ? *decipiens* Sw ♀

Bigger head dirty grey brown fly same genus as 1912
larger with more legs dirtier yellow - body left a ?
See 1732.

N-1917.

Ephedrus gen. inest *Phylomyia enigma*
minute blackish thick w. fly. on ant. - *Cory-*
B. in from Battoson. see 1717

N-1918.

same as 1910? *Oscinis* sp.
red bod. fly. sup. abd.

N-1919

same genus as 1918 *Hippelates*
legs. ant.

N-1920

? var. fly. yell tips & legs (*Attyroglossa*)
var. it is *Ochtheroidea glyptopus*
Porous Sw.

My Dear Professor;

The Guatemala *Atheta* comes
nearest to (*Homalota*) *perdita*
Shp, but is apparently not an
Atheta (for the mesosternum
is rounded), rather a *Tamiasca*;
nor am I certain about the
species.

I shall work up *Atheta*
some day, and separate from
it a number of species belonging
to other (old and new) genera.

Very sincerely yours

A. Ferries

June 7th, 1928.

Dear Professor Thaxter,

You have given me a difficult task this time, but I have done the best I can, and enclose alist. Most of your beetles are new to us. As in most cases I am unable to give you specific names, I am returning the specimens in a small box with the exception of a few examples of Anthicus, etc., which are named, and which I have retained for the collection. I hope the list I send will be sufficient for your purpose.

Yours very sincerely,

Gilbert S. Arrow.

Prof. Roland Thaxter,
